

Eric Eggert

Accessibility Engineer

As a consultant on accessibility and inclusion, I support designers, developers, project managers, and business owners to achieve accessibility for their products and services.

I believe that accessibility can drive innovation when it's considered a fundamental quality of the product. While everyone benefits from an accessible product or service, access to information and participation is a human right. I also think that compliance is the result of a good, holistic accessibility practice.

My positive approach to accessibility and my experience as a public speaker and trainer help to encourage teams to take accessibility seriously. I excel in making accessibility relevant to everyone in project teams due to my deep knowledge of the field. My experience in W3C's Web Accessibility Initiative helped me to have an in-depth understanding of the Web Content Accessibility Guidelines (WCAG).

Selected projects

Senior Accessibility Consultant & Auditor

Zalando | 2023 - 2024

Eric worked as a consultant, supporting various teams through trainings and detailed individual feedback. He helped to get the team a basic understanding of the needs of disabled people and built an understanding of assistive technologies, approaches, and how to plan for accessibility.

Long-Time Accessibility Consultant

Pearson Clinical Assessment

In an ongoing effort to improve Pearson's offerings for accessibility, managing and planning the activities with the Pearson team. This includes:

- Fortnightly consultation meetings with up to 5 Pearson teams
- Ad-hoc quality assurance and guidance for web and app features, including prototyping.
- Multiple accessibility audits where Eric project-managed the conduction of the audit.
- The creation and updates for VPATs.

> Working with Axess Lab on accessibility audits, ongoing support, and regular reviews for our clinical platforms is an incredibly valuable experience. Eric brings deep expertise to the table, helping us pinpoint critical areas for improvement and guiding us through changes that make our digital products more inclusive and compliant. The collaboration is consistently insightful and continues to deliver meaningful impact for our users.

Web Content Accessibility Guidelines (WCAG) 2.2

Aug 2023 - Sept 2024
Berlin

Senior Accessibility Consultant and Tester

Zalando

Consulted for and supported various teams with trainings and detailed feedback. Built understanding of accessibility needs, assistive technologies, automation in design and development, and accessibility strategy. Guided design system changes and conducted accessibility audits ahead of the European Accessibility Act (EAA). Co-Lead the project with internal and external resources.

This project included:

- Coaching Engineering: Talks and one-to-one meetings on how to integrate accessibility in a solid engineering practice, creation of timelines and plans to achieve this goal.
- Coaching Solve, Prevent, Monitor: Creating a detailed plan for Zalando to become accessible for the European Accessibility Act.
- Ongoing Quality Assurance Testing
- To prevent adding accessibility issues, regular QA reviews were set up.

Audits for:

- Online Shop: The complex online shop was reviewed by representative samples against the WCAG 2.2 AA criteria.
- iOS App: The complex iOS app was reviewed by representative samples against the WCAG 2.2 AA criteria.
- Android App: The complex Android app was reviewed by representative samples against the WCAG 2.2 AA criteria.

Accessibility Specialist

World Wide Web Consortium (W3C) Web Accessibility Initiative (WAI)

As part of an EU funded project between 2013 and 2016 and then as a "Fellow" on behalf of Knowbility, I contributed to the work of the World Wide Web Consortium's Web Accessibility Initiative (W3C/WAI). The W3C are the standards makers for the web, including accessibility standards like the Web Accessibility Guidelines (WCAG), foundation of accessibility regulations like Section 508 in the US and the European Accessibility Act (EAA).

During the time at W3C I lead several projects, including:

- Web Accessibility Evaluation Tools List: <https://www.w3.org/WAI/ER/tools/>
- Web Accessibility Tutorials: <https://www.w3.org/WAI/tutorials/>
- International Laws and Policies: <https://www.w3.org/WAI/policies/>
- Implementing the redesign of the WAI website, including building a system for collaborative editing of pages based on GitHub and introducing Jekyll as a static site generator. I wrote all initial HTML, CSS, and JavaScript.
