

Emilia Michanek

Web developer

Emilia, a sysadmin tech-geek, and began her career as a frontend web developer in 2019, using frameworks such as React, and common UI, state management, data fetching, and build tools.

Driven by a deep passion for accessibility and inclusion, she worked hard to also specialize herself in accessibility compliance and testing, in addition to web development.

She possesses extensive knowledge of accessibility laws and regulations (e.g. WCAG and EN 301 549), user testing, technical accessibility, as well as writing accessible code of high quality that works for assistive technologies.

Currently, she works on modern Next.js projects, building high performance web applications, taking responsibility for not only development, but also customer relations, project management, requirement analysis, and cost/budget concerns. Understanding the full business goals of the clients she works with.

Selected projects

Frontend web developer

DigiJag AB | 2019 - Ongoing

Built a school/life platform for people with disabilities, based on a custom CMS. Emilia maintained both an older code base, and led a shift toward a modern redesign using up-to-date web technologies. This led to less code complexity, faster development cycles, and a higher degree of accessibility.

Frontend web developer

DigiVi | 2023 - 2025

Developed a social network for people with special needs, with React, TypeScript, Material UI, SWR, on top of Next.js, allowing for simple robust code. Led the front-end team including planning, estimating, coding, testing, deploying, as well as maintaining the stack, meeting product owners, and user representatives.

Techniques

- HTML
- CSS
- JavaScript
- TypeScript
- React.js
- Material UI
- Next.js
- React Query (Tanstack)
- SWR
- Redux
- CMS (Content Management System)
- Web Accessibility
- WCAG 2.2
- Git
- Linux
- Vercel
- Cloudflare

Methods & Processes

- Accessibility Testing
- Usability test
- Scrum

Testing of PeerTube

HowlRound theatre commons

Did usability testing and accessibility reviews of PeerTube's live video player and live webchat when these two iframes codes are embedded in an external webpage.

Provided and documented their accessibility and usability issues for the developers via their GitHub projects.

Apr 2025 - May 2025

WCAG audit of chat widget

Zalando SE

Test the accessibility of the support chat from Salesforce in Zalando website + iOS + Android apps. Report bugs directly to Salesforce, as well as leaving in a report, and stay on to answer their questions, guiding them in how to code correctly to improve the product.

Jan 2024 - Jun 2024

Accessibility specialist

Pearson

Reviewed a web application from an accessibility perspective together with colleagues. Tested using assistive tools, against web standards, including WCAG 2.1 Level AA. To ensure that people with disabilities could access all content.

Accessibility specialist

Postkodlotteriet

We reviewed the Swedish and Norwegian webpages of the postcode lottery to identify deviations from the new legal requirements for digital accessibility. WCAG 2.1 AA level, as well as EN 301 549. Testing, report writing, handover, and communication with the client were my responsibilities in this project, for a client who has quite a bit of work ahead of them!

Accessibility specialist

Polestar

Helped Polestar test their apps for iOS and Android against the new legal requirements from the European Accessibility Act, as well as Israeli legal requirements, which also refer to WCAG 2.1 level AA. Videos, images, and descriptions, along with proposed solutions, helped developers and designers address deficiencies in the app that controls their cars.

Accessibility specialist

Dustin

Helped Dustin analyze accessibility compliance with new legal requirements in the Accessibility Directive. The external website was reviewed and tested with assistive tools, against standards such as WCAG 2.1 AA, as well as requirements in EN 301 549. The results included proposed solutions and priorities, images and videos, and were highly appreciated by the recipients, who understood what they needed to do to meet the new legal requirements.
