

Karin Toft

Frontend Engineer & Accessibility Specialist (CPWA)

Karin is a senior frontend developer with more than ten years of experience building websites, web applications and reusable frontend components. She has deep expertise in TypeScript, React, accessible component implementation, responsive interfaces, CMS-based delivery and close collaboration with designers, backend developers and stakeholders in complex organisations.

She combines hands-on frontend development with deep accessibility expertise. Her experience includes large product codebases at Zalando, public-sector e-services at CSN, and high-accessibility React delivery for ViewMe.

SELECTED PROJECTS

Frontend developer and accessibility specialist · Zalando

2024 – 2025 · Berlin

Worked in Zalando's accessibility-focused team across the e-commerce purchase journey, including product pages, cart and checkout. Improved screen reader behaviour, form accessibility and interaction order in a complex product organisation.

Frontend developer and accessibility specialist · CSN

2022 – 2023

Reviewed accessibility in a Swedish authority's e-services, website and intranet, then developed e-services and design systems with accessibility champion programs and training.
